### Part VI: Summary of the risk management plan

# Summary of risk management plan for Cabazitaxel EVER Pharma 10 mg/ml concentrate for solution for infusion (Cabazitaxel)

This is a summary of the risk management plan (RMP) for Cabazitaxel EVER Pharma 10 mg/ml concentrate for solution for infusion. The RMP details important risks of Cabazitaxel EVER Pharma 10 mg/ml concentrate for solution for infusion, how these risks can be minimised, and how more information will be obtained about Cabazitaxel EVER Pharma 10 mg/ml concentrate for solution for infusion srisks and uncertainties (missing information).

Cabazitaxel EVER Pharma 10 mg/ml concentrate for solution for infusion's summary of product characteristics (SmPC) and its package leaflet give essential information to healthcare professionals and patients on how Cabazitaxel EVER Pharma 10 mg/ml concentrate for solution for infusion should be used.

Important new concerns or changes to the current ones will be included in updates of Cabazitaxel EVER Pharma 10 mg/ml concentrate for solution for infusion's RMP.

#### I. The medicine and what it is used for

Cabazitaxel EVER Pharma 10 mg/ml concentrate for solution for infusion is authorised for the treatment of prostate cancer (see SmPC for the full indication).

It contains cabazitaxel as the active substance and it is given by intravenous infusion.

## II. Risks associated with the medicine and activities to minimise or further characterise the risks

Important risks of Cabazitaxel EVER Pharma 10 mg/ml concentrate for solution for infusion, together with measures to minimise such risks and the proposed studies for learning more about Cabazitaxel EVER Pharma 10 mg/ml concentrate for solution for infusion's risks, are outlined below.

Measures to minimise the risks identified for medicinal products can be:

- Specific information, such as warnings, precautions, and advice on correct use, in the package leaflet and SmPC addressed to patients and healthcare professionals;
- Important advice on the medicine's packaging;
- The authorised pack size the amount of medicine in a pack is chosen so to ensure that the medicine is used correctly;
- The medicine's legal status the way a medicine is supplied to the patient (e.g. with or without prescription) can help to minimise its risks.

Together, these measures constitute routine risk minimisation measures.

In addition to these measures, information about adverse reactions is collected continuously and regularly analysed, including PSUR assessment - so that immediate action can be taken as necessary. These measures constitute *routine pharmacovigilance activities*.

If important information that may affect the safe use of Cabazitaxel EVER Pharma 10 mg/ml concentrate for solution for infusion is not yet available, it is listed under 'missing information' below.

#### II.A List of important risks and missing information

Important risks of Cabazitaxel EVER Pharma 10 mg/ml concentrate for solution for infusion are risks that need special risk management activities to further investigate or minimise the risk, so that the medicinal product can be safely administered. Important risks can be regarded as identified or potential. Identified risks are concerns for which there is sufficient proof of a link with the use of Cabazitaxel EVER Pharma 10 mg/ml concentrate for solution for infusion. Potential risks are concerns for which an association with the use of this medicine is possible based on available data, but this association has not been established yet and needs further evaluation. Missing information refers to information on the safety of the medicinal product that is currently missing and needs to be collected (e.g. on the long-term use of the medicine).

List of important risks and missing information	
Important identified risks	<ul> <li>Neutropenia and associated clinical events</li> <li>Gastrointestinal disorders</li> <li>Renal failure</li> <li>Peripheral neuropathy</li> <li>Anemia</li> <li>Respiratory disorders</li> <li>Use in severe hepatic impairment</li> </ul>
Important potential risks	<ul> <li>Cardiac arrhythmia</li> <li>Hepatic disorders</li> <li>Lens toxicity</li> <li>Effect on male fertility</li> <li>Use in non-evaluated indications</li> <li>Drug-drug interaction (concomitant administration with inducers or with inhibitors of CYP3A)</li> <li>Mild and moderate hepatic impairment</li> <li>Teratogenicity</li> <li>Drug preparation errors, i.e. reconstitution errors</li> </ul>
Missing information	Ethnicity other than Caucasian

#### II.B Summary of important risks

The safety information in the proposed Product Information is aligned to the reference medicinal product.

However, the safety concern "drug preparation errors, i.e. reconstitution errors" was changed from an important identified risk to an important potential risk as Cabazitaxel EVER Pharma 10 mg/ml concentrate for solution for infusion (1- vial) is supplied as a concentrate ready to be diluted with the recommended diluents (1-step process) without requiring an intermediate step to mix the concentrate with a solvent as for the reference medicinal product Jevtana with a 2-step dilution process (diluted to a premix prior to dilution into infusion solutions).

#### II.C Post-authorisation development plan

#### II.C.1 Studies which are conditions of the marketing authorisation

There are no studies which are conditions of the marketing authorisation or specific obligation of Cabazitaxel EVER Pharma 10 mg/ml concentrate for solution for infusion.

#### II.C.2 Other studies in post-authorisation development plan

There are no studies required for Cabazitaxel EVER Pharma 10 mg/ml concentrate for solution for infusion.
