

**Part VI: Summary of the risk management plan****Summary of risk management plan for Vinorelbine Accord 20 mg/ 30 mg/ 80 mg capsule, soft (Vinorelbine)**

This is a summary of the risk management plan (RMP) for Vinorelbine Accord 20 mg/ 30 mg/ 80 mg capsule, soft. The RMP details important risks of Vinorelbine Accord 20 mg/ 30 mg/ 80 mg capsule, soft, how these risks can be minimised, and how more information will be obtained about vinorelbine risks and uncertainties (missing information).

‘Vinorelbine Accord 20 mg/ 30 mg/ 80 mg capsule, soft’s summary of product characteristics (SmPC) and its package leaflet give essential information to healthcare professionals and patients on how vinorelbine should be used.

Important new concerns or changes to the current ones will be included in updates of vinorelbine RMP.

**I. The medicine and what it is used for**

Vinorelbine Accord 20 mg/ 30 mg/ 80 mg soft capsules are indicated in adults for:

- Treatment of advanced non small cell lung cancer.
- Treatment of advanced breast cancer when other treatment is not appropriate.

It contains vinorelbine as the active substance and it is given orally.

**II. Risks associated with the medicine and activities to minimise or further characterise the risks**

Important risks of Vinorelbine Accord 20 mg/ 30 mg/ 80 mg capsule, soft together with measures to minimise such risks and the proposed studies for learning more about vinorelbine risks, are outlined below.

Measures to minimise the risks identified for medicinal products can be:

- Specific information, such as warnings, precautions, and advice on correct use, in the package leaflet and SmPC addressed to patients and healthcare professionals;
- Important advice on the medicine’s packaging;

The data and conclusions included in this report are confidential and proprietary information of Marketing Authorization Holder.

- The authorised pack size - the amount of medicine in a pack is chosen so to ensure that the medicine is used correctly;
- The medicine's legal status - the way a medicine is supplied to the patient (e.g. with or without prescription) can help to minimise its risks.

Together, these measures constitute routine risk minimisation measures.

In addition to these measures, information about adverse reactions is collected continuously and regularly analysed during signal management activity so that immediate action can be taken as necessary. These measures constitute routine pharmacovigilance activities.

## II.A List of important risks and missing information

Important risks of Vinorelbine Accord 20 mg/ 30 mg/ 80 mg capsule, soft are risks that need special risk management activities to further investigate or minimise the risk, so that the medicinal product can be safely taken. Important risks can be regarded as identified or potential. Identified risks are concerns for which there is sufficient proof of a link with the use of Vinorelbine Accord 20 mg/ 30 mg/ 80 mg capsule, soft. Potential risks are concerns for which an association with the use of this medicine is possible based on available data, but this association has not been established yet and needs further evaluation. Missing information refers to information on the safety of the medicinal product that is currently missing and needs to be collected (e.g. on the long-term use of the medicine);

Important identified risks	<ul style="list-style-type: none"> <li>• None</li> </ul>
Important potential risks	<ul style="list-style-type: none"> <li>• None</li> </ul>
Missing information	<ul style="list-style-type: none"> <li>• None</li> </ul>

## II.B Summary of important risks

The safety information in the proposed product information is aligned to the reference medicinal product.
