

Part VI: Summary of the risk management plan**Summary of risk management plan Letrozole 2.5 mg Film-Coated Tablets (Letrozole)**

This is a summary of the risk management plan (RMP) for Letrozole 2.5 mg film-coated tablets. The RMP details important risks of Letrozole 2.5 mg film-coated tablets, how these risks can be minimised, and how more information will be obtained about Letrozole 2.5 mg film-coated tablets and uncertainties (missing information).

Letrozole 2.5 mg film-coated tablet's summary of product characteristics (SmPC) and its package leaflet give essential information to healthcare professionals and patients on how Letrozole 2.5 mg film-coated tablets should be used.

Important new concerns or changes to the current ones will be included in updates of Letrozole 2.5 mg film-coated tablet's RMP.

I. The medicine and what it is used for

Letrozole 2.5 mg film-coated tablets are indicated for following indications:

- Adjuvant treatment of postmenopausal women with hormone receptor positive invasive early breast cancer.
- Extended adjuvant treatment of hormone-dependent invasive breast cancer in postmenopausal women who have received prior standard adjuvant tamoxifen therapy for 5 years.
- First-line treatment in postmenopausal women with hormone-dependent advanced breast cancer.
- Advanced breast cancer after relapse or disease progression, in women with natural or artificially induced postmenopausal endocrine status, who have previously been treated with anti-oestrogens.
- Neo-adjuvant treatment of postmenopausal women with hormone receptor positive, HER-2 negative breast cancer where chemotherapy is not suitable and immediate surgery not indicated.

Efficacy has not been demonstrated in patients with hormone receptor negative breast cancer.

The data and conclusions included in this report are confidential and proprietary information of Marketing Authorization Holder.

It contains letrozole as the active substance and it is given orally.

II. Risks associated with the medicine and activities to minimise or further characterise the risks

Important risks of Letrozole 2.5 mg film-coated tablets, together with measures to minimise such risks and the proposed studies for learning more about Letrozole 2.5 mg film-coated tablet's risks, are outlined below.

Measures to minimise the risks identified for medicinal products can be:

- Specific information, such as warnings, precautions, and advice on correct use, in the package leaflet and SmPC addressed to patients and healthcare professionals;
- Important advice on the medicine's packaging;
- The authorised pack size - the amount of medicine in a pack is chosen so to ensure that the medicine is used correctly;
- The medicine's legal status - the way a medicine is supplied to the patient (e.g. with or without prescription) can help to minimise its risks.

Together, these measures constitute routine risk minimisation measures.

In addition to these measures, information about adverse reactions is collected continuously and regularly analysed including signal management activity, so that immediate action can be taken as necessary. These measures constitute routine pharmacovigilance activities.

II.A List of important risks and missing information

Important risks Letrozole 2.5 mg film-coated tablets are risks that need special risk management activities to further investigate or minimise the risk, so that the medicinal product can be safely taken. Important risks can be regarded as identified or potential. Identified risks are concerns for which there is sufficient proof of a link with the use of Letrozole 2.5 mg film-coated tablets. Potential risks are concerns for which an association with the use of this medicine is possible based on available data, but this association has not been established yet and needs further evaluation. Missing information refers to information on the safety of the medicinal product that is currently missing and needs to be collected (e.g. on the long-term use of the medicine).

The data and conclusions included in this report are confidential and proprietary information of Marketing Authorization Holder.

Important potential risks	<ul style="list-style-type: none">• None
Missing Information	<ul style="list-style-type: none">• None

II.B Summary of important risks

The safety information in the proposed Product Information is aligned to the reference medicinal product.

II.C Post-authorisation development plan

II.C.1 Studies which are conditions of the marketing authorisation

There are no studies which are conditions of the marketing authorization or specific obligation of Letrozole 2.5 mg film-coated tablets.

II.C.2 Other studies in post-authorisation development plan

There are no studies required for Letrozole 2.5 mg film-coated tablets as post-authorisation development plan.
