Part VI: Summary of the risk management plan

Summary of risk management plan for Fludarabine phosphate 25 mg/ml Concentrate for Solution for Injection or Infusion (fludarabine phosphate)

This is a summary of the risk management plan (RMP) for Fludarabine phosphate 25 mg/ml Concentrate for Solution for Injection or Infusion. The RMP details important risks of Fludarabine phosphate 25 mg/ml Concentrate for Solution for Injection or Infusion, how these risks can be minimised, and how more information will be obtained about Fludarabine phosphate 25 mg/ml Concentrate for Solution for Injection or Infusion's risks and uncertainties (missing information).

Fludarabine phosphate 25 mg/ml Concentrate for Solution for Injection or Infusion's summary of product characteristics (SmPC) and its package leaflet give essential information to healthcare professionals and patients on how Fludarabine phosphate 25 mg/ml Concentrate for Solution for Injection or Infusion should be used.

Important new concerns or changes to the current ones will be included in updates of Fludarabine phosphate 25 mg/ml Concentrate for Solution for Injection or Infusion's RMP.

I. The medicine and what it is used for

Fludarabine phosphate 25 mg/ml Concentrate for Solution for Injection or Infusion is used for the treatment of B-cell chronic lymphocytic leukaemia (CLL) in adult patients with sufficient bone marrow reserves.

First line treatment with Fludarabine should only be initiated in adult patients with advanced disease, Rai stages III/IV (Binet stage C), or Rai stages I/II (Binet stage A/B) where the patient has disease related symptoms or evidence of progressive disease.

It contains fludarabine phosphate as the active substance and it is given intravenously.

II. Risks associated with the medicine and activities to minimise or further characterise the risks

Important risks of Fludarabine phosphate 25 mg/ml Concentrate for Solution for Injection or Infusion together with measures to minimise such risks and the proposed studies for learning more

The data and conclusions included in this report are confidential and proprietary information of Marketing Authorization Holder.

about Fludarabine phosphate 25 mg/ml Concentrate for Solution for Injection or Infusion risks, are outlined below.

Measures to minimise the risks identified for medicinal products can be:

- Specific information, such as warnings, precautions, and advice on correct use, in the package leaflet and SmPC addressed to patients and healthcare professionals;
- Important advice on the medicine's packaging;
- The authorised pack size - the amount of medicine in a pack is chosen so to ensure that the medicine is used correctly;
- The medicine's legal status - the way a medicine is supplied to the patient (e.g. with or without prescription) can help to minimise its risks.

Together, these measures constitute routine *risk minimisation* measures.

In addition to these measures, information about adverse reactions is collected continuously and regularly analysed, so that immediate action can be taken as necessary. These measures constitute *routine pharmacovigilance activities*.

II.A List of important risks and missing information

Important risks of Fludarabine phosphate 25 mg/ml Concentrate for Solution for Injection or Infusion are risks that need special risk management activities to further investigate or minimise the risk, so that the medicinal product can be safely taken. Important risks can be regarded as identified or potential. Identified risks are concerns for which there is sufficient proof of a link with the use of Fludarabine phosphate 25 mg/ml Concentrate for Solution for Injection or Infusion. Potential risks are concerns for which an association with the use of this medicine is possible based on available data, but this association has not been established yet and needs further evaluation. Missing information refers to information on the safety of the medicinal product that is currently missing and needs to be collected (e.g. on the long-term use of the medicine);

Summary of safety concerns	
Important identified risks	• None
Important potential risks	• None

Summary of safety concerns	
Missing information	• None

II.B Summary of important risks

The safety information in the proposed product information is aligned to the reference medicinal product.

II.C Post-authorisation development plan

II.C.1 Studies which are conditions of the marketing authorisation

There are no studies which are conditions of the marketing authorisation or specific obligation of Fludarabine phosphate 25 mg/ml Concentrate for Solution for Injection or Infusion.

II.C.2 Other studies in post-authorisation development plan

There are no studies required for Fludarabine phosphate 25 mg/ml Concentrate for Solution for Injection or Infusion.

The data and conclusions included in this report are confidential and proprietary information of Marketing Authorization Holder.
